## We've grown rapidly to over 300 desalination plants across the globe...

Desalination plants across 40 countries depend on the reliability, quality and performance of the industry's most energy efficient seawater reverse osmosis (SWRO) membranes. From the Caribbean, across the Mediterranean, the Middle East and Asia, LG NanoH<sub>2</sub>O's **QuantumFlux**® membranes produce more than 300 million liters of water per day, purifying water from a broad range of sources with improved water quality and productivity.

Contact LG NanoH<sub>2</sub>O today to find out how **QuantumFlux** can help you lower the cost of desalination. Visit us at our new website: [www.lg-nanoh2o.com](http://www.lg-nanoh2o.com)
